

Video Tips Easy Examples

Auditory Sandwich

1

Learning to listen takes experience. Provide a child with opportunities to listen first, next listen with a visual cue, then listen again.

2

To add visuals as needed: Use objects in babies' play. Put gestures in toddlers' routines. Provide pictures in preschoolers' activities.

3

By building an auditory sandwich (hear/see/hear) you offer conversational repetition to help children improve their listening and language.
